

Agrilan[®] 1015

A biodegradable dispersant
for aqueous crop protection
formulations

Nouryon

Agrilan 1015

Agrilan 1015 is a biodegradable dispersant for aqueous crop formulations. It offers a unique patent-protected technology with tapered hydrophobic linking between the hydrophobic and hydrophilic moiety.

Key benefits

- Liquid dispersant
- Biodegradable and not persistent, addressing concerns regarding bio accumulative dispersants
- No risk or classified ingredients
- Emulsifying and wetting agent for water-based formulations, such as EW and SE
- Low foaming

Typical properties

Appearance	clear liquid
CMC	60 mg/l
Color	< 1 Gardner
Density at 20°C	1.06 g/l
pH	6.0
Solid content	50%
Surface tension at 0.1 wt%	32 mN/m
Viscosity* at 20°C	700 cps

*Brookfield DV-III Plus Rheometer; SC-18 spindle @ 25 rpm

Suggested SC formulation for Azoxystrobin, Tebuconazole or Diuron

Ingredient	g/L
Active	200-300
Morwet EFW	20
Agrilan 1015*	25
Ethylene glycol	50
Defoamer	1-2
Xanthan Gum	1-2
Water	up to 1 L

*Due to superior wetting of the dispersant, Agrilan 1015 could be used in lieu of the wetting agent (Morwet EFW)

Regulatory

- TSCA and FIFRA listing under consideration
- Meets REACH polymer exemption
- Listed in China and Japanese Chemical Inventory

Biodegradability

- Biodegradability of Agrilan 1015 as well as a competitor product based on Ethoxylated TSP-phosphate ester (TSP-PE) were evaluated
- Continues to biodegrade even after 12 weeks, whereas for TSP biodegradation levels out after three weeks
- Can be designated as inherently biodegradable and not persistent, whereas TSP-PE is nearly non-biodegradable and persistent

Percentage of biodegradation of Agrilan 1015 and TSP-PE by activated sludge. The horizontal line represents the percentage achieved upon complete degradation of propylene glycol.

Diuron 300 g/L SC

Some particle size growth upon storage but under better control with Agrilan 1015.

- Overall viscosity profile for both SC's are similar (low to moderate viscosity)
- Similar suspensibility (~90%) at RT but Agrilan 1015 is more favorable upon storage

Biodegradable liquid dispersant Agrilan 1015 works either as well or better than benchmark

Guideline recipes

Azoxystrobin 250 g/L SC

Ingredient	g/L
Azoxystrobin	250
Agrilan 1015	40
Mono ethylene glycol	30
Biocide	2
Defoamer	2
Xanthan Gum	2
Water	up to 1 L

Physical appearance	off-white suspension
Particle size, d98, µm	3.5
Suspensibility	ca 100%
Stability, 0°C after 1 week	no bleeding
Stability, 54°C after 2 weeks	trace bleeding

Prochloraz 250 g/L EW

Ingredient	g/L
Prochloraz	250
Agrilan 1015	30
Berol 904	30
Solvesso 200	200
Defoamer	1
Mono ethylene glycol	50
Xanthan Gum	1.6
DI water	up to 1 L

Physical appearance	white liquid
pH (5% in water)	7.7
Density at 25°C	1.086
Emulsion stability (342 ppm)	stable (2 hrs)
Viscosity, 30 rpm, S62, 25°C	520
Stability, 0°C after 1 week	stable
Stability, 54°C after 2 weeks	stable

Liquid dispersant
For crop protection, including
seed treatment formulations

Low toxicity
No classified ingredients

Biodegradable
And non-persistent

Emulsifier and wetting agent
For SEs and EWs, low foam

Nouryon

Nouryon is a global, specialty chemicals leader. Markets and consumers worldwide rely on our essential solutions to manufacture everyday products, such as personal care, cleaning goods, paints and coatings, agriculture and food, pharmaceuticals, and building products. Furthermore, the dedication of more than 7,900 employees with a shared commitment to our customers, business growth, safety, sustainability and innovation has resulted in a consistently strong financial performance. We operate in over 80 countries around the world with a portfolio of industry-leading brands. Visit our website and follow us @Nouryon and on LinkedIn.

All information concerning our products and/or all suggestions for handling and use contained herein (including formulation and toxicity information) are offered in good faith and are believed to be reliable. However, Nouryon makes no warranty express or implied (i) as to the accuracy or sufficiency of such information and/or suggestions, (ii) as to any product's merchantability or fitness for a particular use or (iii) that any suggested use (including use in any formulation) will not infringe any patent.
